

**Subject:**

11th International Symposium on Fiber Reinforced Polymer for Reinforced Concrete Structures  
FRPRCS-11  
June 26-28 2013

**Date:** 21-11-2012

Dear Sir/Madam,

The possibilities and challenges for the application of FRP (Fiber Reinforced Polymers) composite materials in both new and existing reinforced concrete structures have been the subject of an International Conference that has been held every two years, with the designation *Fiber Reinforced Polymer for Reinforced Concrete Structures* (FRPRCS). Aiming to continue the success of the ten previous editions of FRPRCS, the most recent developments regarding FRP application in reinforced concrete structures, in its technological, scientific and applied views will be discussed in the next symposium, FRPRCS-11, which will be held in Guimarães, Portugal, from 26<sup>th</sup> to 28<sup>th</sup> June 2013, in the Cultural Centre Vila Flor. The event is organized by ISISE - Institute for Sustainability and Innovation in Structural Engineering - and by the University of Minho (conference website -<http://www.frprcs11.uminho.pt>). More than 250 abstracts have been received, with authors from 35 countries and 5 continents, showing the relevance that this event and its themes have among the technical/scientific community.

In view of the connection between the event and the commercial interests of your company, we consider that this conference will be an excellent opportunity to promote your products and/or services. Therefore, we would like to inform you about the several possible sponsoring conditions, which are summarized in the table on the next page.

I am at your disposal for any further inquiries. Hopeful that you might consider our proposal, with best regards,

Joaquim Barros  
President of the Organizing Committee of FRPRCS-11

PS: The Flyer of FRPRCS-11 is attached.
